NEW 10-PIECE KIT AVAILABLE NOW!

Part ID: 14353

BRM, inventors of the Flex-Hone®, are now offering a new kit that is ideal for a variety of automotive applications such as brake calipers, lifter bores, and u-joint yokes. The Flex-Hone® Tool is a resilient, flexible honing tool with a soft cutting action. Whether it's deburring a hole or blending an edge, the Flex-Hone will provide a superior surface finish with an oil holding crosshatched pattern. The Flex-Hone is also useful for many bearing and bushing applications. The 10 Piece kit features Flex-Hone sizes: 10mm, 1/2", 5/8", 3/4", 7/8", 1", 1-1/4", 1-1/2", 1-3/4" and 2" in 180 grit silicon carbide abrasive. The kit also contains 1/2 pint of our exclusive Flex-Hone oil which is recommended to produce the best finish and promotes longer hone life. Included in the kit is a flash drive containing how-to videos and instructions for use. As an added bonus to thank you for using Brush Research products, we are including our premium BRM baseball cap so you can hone in style.
